Please search the following as soon as possible for application with serial number 09/922683

1. SEQ ID NO: 7, against all <u>commercial nucleic acid databases</u> including <u>issued patents database</u> and <u>pending</u> <u>application database</u> and provide a <u>print of all results</u>.

If you have any questions please call me at the above phone number.

Thanks

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

The length in codons is given for each CDS.
Usually the highest scoring match found by fasta -o is given for CDS which show significant similarity to other CDS in the database. The position of possible ribosome binding site sequences are given where these have been used to deduce the initiation codon. Gene
